Professional Summary

Full-Stack Developer experienced in building pixel-perfect, responsive, and production-ready web applications from design specifications. Skilled in React, JavaScript, and Tailwind CSS, with a focus on building reusable, maintainable components that reduce development time by up to **30%** and simplify long-term application maintenance.

Experience

Languages : Golang, Javascript, SQL

Frameworks: React, Express, Tailwindcss, Shadcn

Tools: GitHub, Docker, Postman

Projects

- **Farm Manager - Github**
 - Developed a full-stack React/Go application to help farmers track farm expenditures.
 - Provides a financial and expenditure overview from planting to harvesting.
 - Helps farmers maintain better financial records and make informed decisions when pricing produce.
- **SoilIQ**
 - Collaborated on a farmer dashboard using React.js.
 - Integrated APIs to fetch satellite-based soil and weather data.
 - Helped farmers make data-driven decisions on crop selection and appropriate farming practices.
 - Supported farm preparation through weather forecasts, helping reduce crop losses.
- **Local Leaders Fund**
 - Applied SEO techniques to WordPress site content to improve search engine visibility.
 - Increased click-through rate (CTR) by up to **50%**.
 - Achieved top Google search rankings in **July and August 2026**.

Education

Bsc. Computer Science – Egerton University
